I'm Abdullah Sultan, a passionate and committed front-end designer that has focused his career on building beautiful and intuitive websites and web applications. I have developed my abilities and knowledge in numerous facets of front-end design and development over the course of my two years in the industry. I'll showcase the most significant products, resources, skills, and abilities in this portfolio.

My area of expertise is front-end design, which is the process of transforming original concepts and user-centered ideas into alluring digital experiences. I have a good sense of aesthetic design and a thorough grasp of user experience principles. In order to ensure that websites appear fantastic and work flawlessly on a variety of devices and browsers, my goal is to close the gap between creativity and functionality.

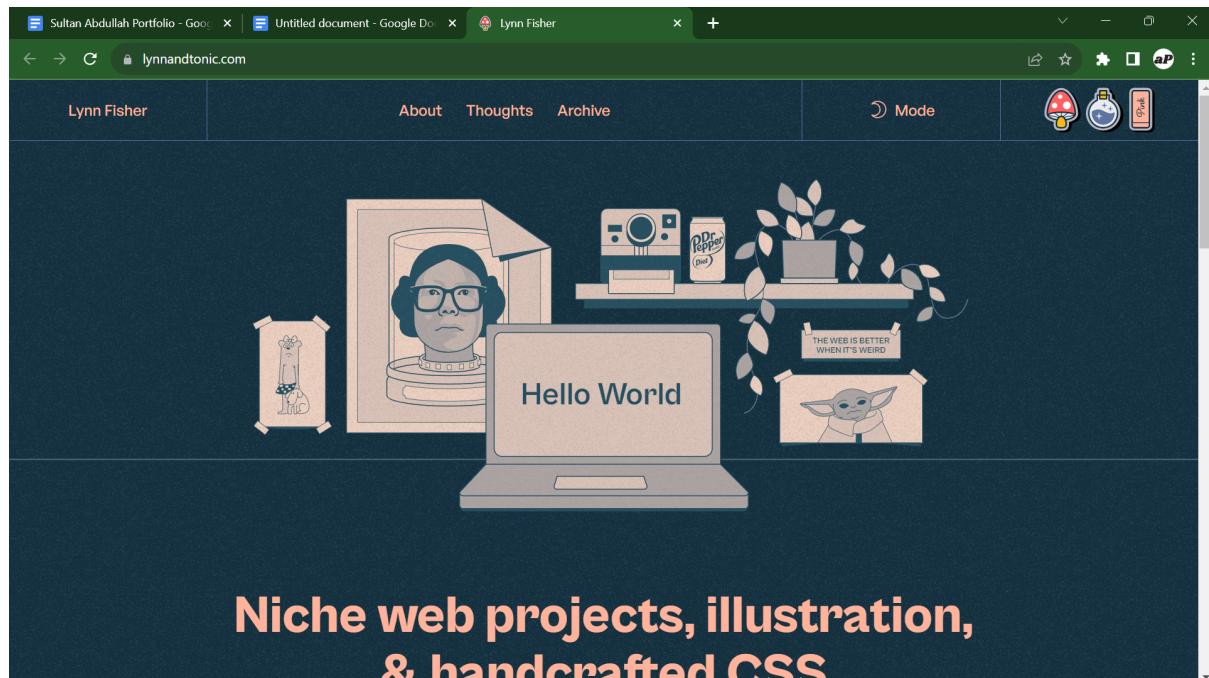

Portfolio Samples

Matt Farley - Frontend Developer <https://mattfarley.ca/>

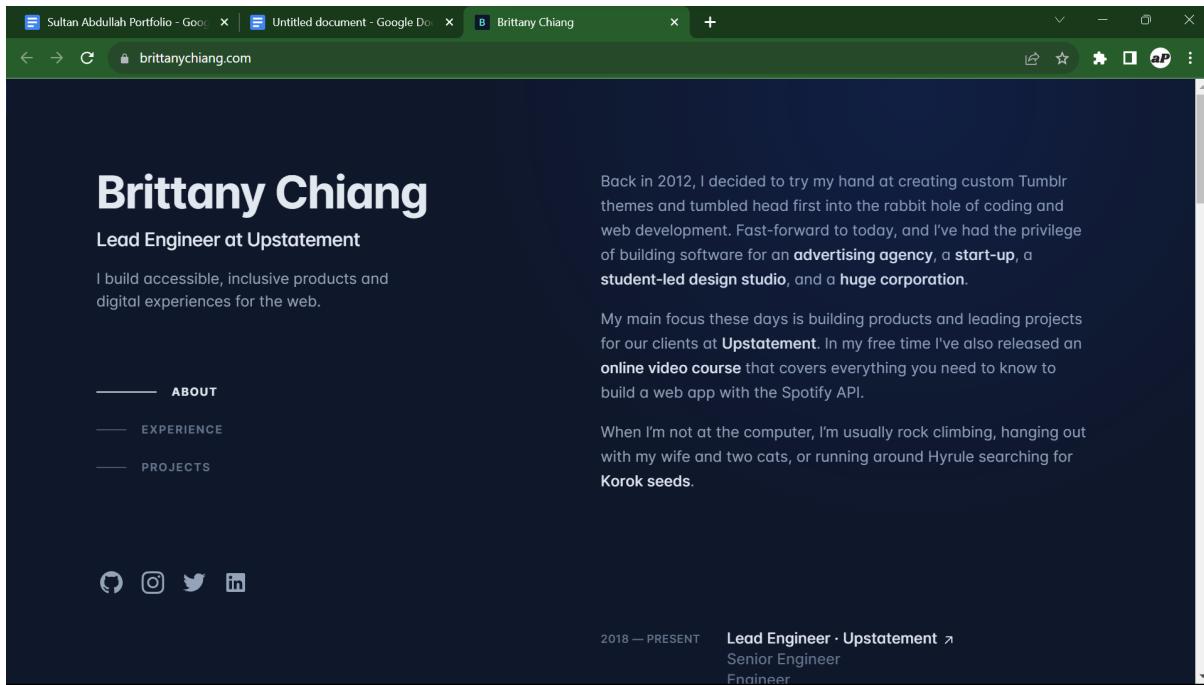

A screenshot of a web browser showing three tabs: "Sultan Abdullah Portfolio - Google Sheets", "Untitled document - Google Docs", and "Matt Farley | Designer, Frontend". The main content area features a purple logo icon, a "Mentorship" button, and a "Say Hello" button. Below this is a large section titled "Designer, Frontend Developer & Mentor" with a subtext "I design and code beautifully simple things, and I love what I do." A circular profile picture of a smiling man is centered in the middle.

Lynn Fisher - Designer <https://lyninandtonic.com/>

A screenshot of a web browser showing three tabs: "Sultan Abdullah Portfolio - Google Sheets", "Untitled document - Google Docs", and "Lynn Fisher". The main content area has a dark background with a central illustration featuring a laptop displaying "Hello World", a small robot head, a can of Dr Pepper, and a plant. Text on the right side reads "THE WEB IS BETTER WHEN IT'S WEIRD". At the bottom, there is a pink banner with the text "Niche web projects, illustration, & handcrafted CSS". The navigation bar includes links for "About", "Thoughts", "Archive", and "Mode".

Brittany Chiang

Lead Engineer at Upstatement

I build accessible, inclusive products and digital experiences for the web.

— ABOUT —

— EXPERIENCE —

— PROJECTS —

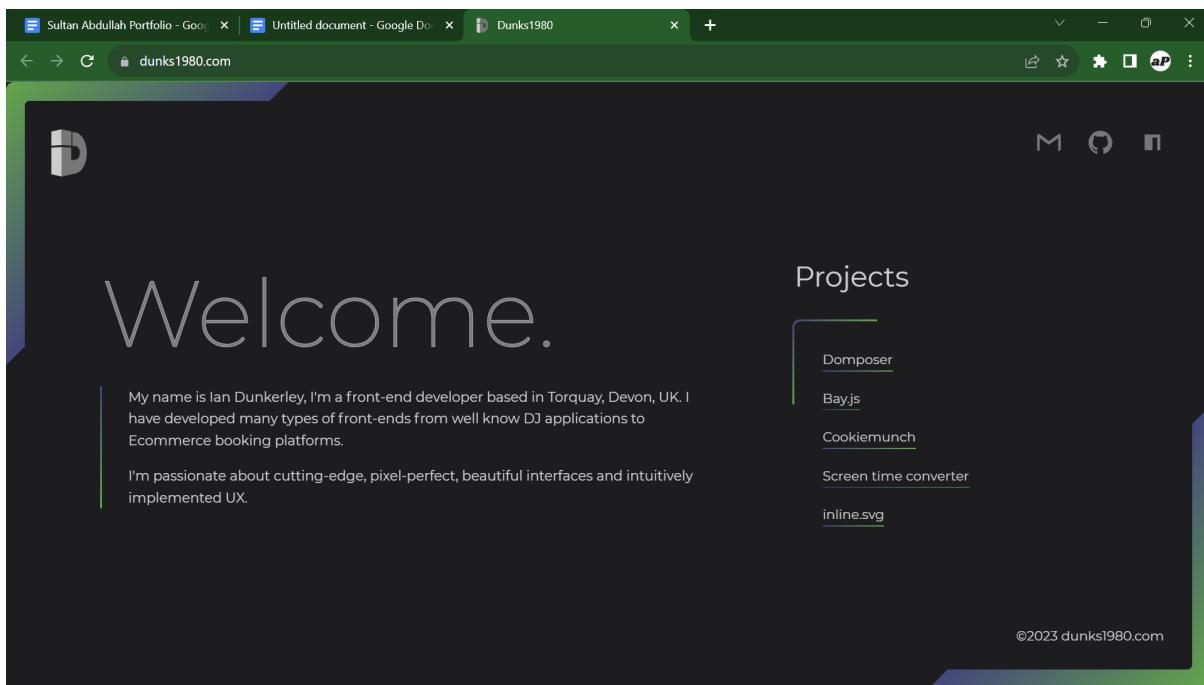

Back in 2012, I decided to try my hand at creating custom Tumblr themes and tumbled head first into the rabbit hole of coding and web development. Fast-forward to today, and I've had the privilege of building software for an **advertising agency**, a **start-up**, a **student-led design studio**, and a **huge corporation**.

My main focus these days is building products and leading projects for our clients at **Upstatement**. In my free time I've also released an **online video course** that covers everything you need to know to build a web app with the Spotify API.

When I'm not at the computer, I'm usually rock climbing, hanging out with my wife and two cats, or running around Hyrule searching for **Korok seeds**.

dunks1980.com

Welcome.

My name is Ian Dunkerley, I'm a front-end developer based in Torquay, Devon, UK. I have developed many types of front-ends from well known DJ applications to Ecommerce booking platforms.

I'm passionate about cutting-edge, pixel-perfect, beautiful interfaces and intuitively implemented UX.
